SUMMARY

Frontend developer at Sky Option, a fintech company, building production React.js and Next.js dashboards and websites for forex brokerage and trading platforms. Experienced in turning Figma designs into responsive interfaces, integrating REST APIs, and working with real-time WebSocket data and Electron.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frameworks & Tools: React.js, Next.js, Electron, Vite, Git, GitHub, Figma
UI & Styling: Tailwind CSS, Material UI, shadcn/ui, Bootstrap, GSAP, Responsive Design
State, Forms & Data: Redux, React Context API, TanStack Query, React Hook Form, Zod, REST APIs, NextAuth.js
Real-Time & Backend: WebSockets, HMAC-based message authentication, Docker
JavaScript Concepts: Closures, Scope & Execution Context, Callbacks & Higher-Order Functions, Asynchronous JavaScript & Event Loop, Type Coercion, Prototypes & Classes (OOP), Metaprogramming, JavaScript Fundamentals

EXPERIENCE

Frontend Developer | Sky Option for IT Solutions (Fintech Company) **October 2025 – Present**

- Contribute to production fintech platforms for forex brokers and trading, implementing features, improving existing interfaces, and redesigning pages within established codebases.
- Implemented a feature that opens a dedicated Electron window from an action such as a button click, reused across the dashboard (e.g. account profile), and learned Electron's main, preload, and renderer processes in depth.
- Redesigned the dashboard's main table design and several pages to match Figma designs, and fixed form bugs by correcting the data the forms accept.
- Integrate backend APIs with TanStack Query once the backend developer provides them; handle forms and MUI tables.
- Completed the Econnex forex brokerage website (econnexltd.com; Next.js, Tailwind CSS, shadcn/ui), continuing from a scaffold started by another developer and implementing it pixel-perfect from the Figma design; integrated a WebSocket connection with HMAC-based message authentication and a validated contact form.

Web Development Intern (React.js) | Sky Option for IT Solutions (Internship, Remote) **June 2025 – October 2025**

- Joined the team on production forex brokerage applications, learning the existing codebases, collaborating with developers, and delivering assigned tasks on deadline.
- Built new pages in a forex broker administration dashboard (React.js, Electron, Material UI), including a moderators page with a filterable, sortable data table with search by ID, a multi-step dialog to add moderators with a validated form (React Hook Form with MUI Controller), and column visibility controls.
- Implemented light and dark themes that follow the operating system preference, and fixed UI and responsive-design bugs, including responsive layouts for a second React.js dashboard.

PROJECTS

Broker Dashboard | Independent project, in development github.com/jumpsc4re2/broker-dashboard
React.js, TypeScript, shadcn/ui, WebSockets, Docker

- Independently building a broker-style administration dashboard with a React.js and TypeScript frontend and a Docker-based development setup.
- Implemented real-time position and profit-and-loss (P&L) updates over WebSockets, with pie, bar, and area charts for profit, shares, orders, and revenue.
- Built responsive customer and administrator data tables and validated forms, with a Docker-based local environment.

Qualified | Car mechanic center website github.com/jumpsc4re2/qualified-center-next
Next.js, React.js, TypeScript, Tailwind CSS

- Built a responsive website for an automotive services center, covering service showcases, pricing, and contact info, with Arabic-friendly typography, reusable UI components, and optimized static pages.

EDUCATION

Bachelor's Degree in Information Technology | 6th of October Technological University **2024 – 2028 (expected)**
Faculty of Industry and Energy Technology. Third-year student; achieved an A rank in each of the last two academic years.

High School Diploma: Information Technology – Web Programming | WE School for Applied Technology **2024**
Final score 679.5/700 (97.14%); ranked 11th in the school.

CERTIFICATIONS

- React – The Complete Guide 2025 (incl. Next.js, Redux) | Udemy, Maximilian Schwarzmüller | January 2025
- JavaScript: The Hard Parts, v3 | Frontend Masters, Will Sentance | May 2026
- Internship Certificate: Web Development Intern (Reactjs) | Sky Option for IT Solutions | 2025
